JD: [`649-myworkdayjobs-database-engineer-information-system-199789-2026-05-07.md`](649-myworkdayjobs-database-engineer-information-system-199789-2026-05-07.md)

Dear ODHS hiring team,

I am writing to apply for the **Database Engineer (Information Systems Specialist 7)** role in the **Data Office** program. The posting's focus-**secure, scalable data infrastructure**, models that support **reporting and self-service BI**, collaboration across analysts and program partners, and sound **governance** (RBAC, masking, lineage)-matches work I have done in **enterprise data and integration contexts**, where transaction systems feed operational and analytical consumers under tight correctness constraints.

I have spent significant time with **relational databases**, performance troubleshooting on **SQL Server-class** workloads, and cross-team delivery when **millions of dollars or statewide operations** depend on batch and near-real-time flows. I am motivated by ODHS's **equity-focused mission** and by building datasets and patterns that help leaders see problems clearly without exposing sensitive data inappropriately. I am **eager to deepen Snowflake-specific delivery** alongside on-prem SQL Server where your architecture spans both.

I hold a **BS in Computer Information Systems**, am a **U.S. veteran**, and am committed to the communication and documentation habits that make shared data assets usable across DHS.

Thank you for your time and consideration.

Best regards, *[Your name]*
