JD: [`650-myworkdayjobs-information-architect-information-sy-199857-2026-05-07.md`](650-myworkdayjobs-information-architect-information-sy-199857-2026-05-07.md)

Dear EIS hiring team,

I am applying for the **Information Architect (Information Systems Specialist 6)** role in **Strategy and Design**. The responsibilities-aligning **business capabilities**, **information domains**, and **technology** choices; supporting **enterprise standards**; mapping relationships between processes, applications, and data; and contributing to durable **documentation**-are a natural extension of how I have operated during large **platform migrations** and **integration programs** in the private sector.

I am strongest where architecture work meets **execution discipline**: clarifying non-functional requirements (security, operability, ownership), translating agency pain points into **integration patterns** teams can repeat, and keeping **traceability** so audits and future modernization don't start from zero. I am comfortable partnering with **principal/senior architects** and agency stakeholders who may not share the same technical vocabulary.

I hold a **BS in Computer Information Systems**, am a **U.S. veteran**, and welcome **hybrid** collaboration in the Salem area as described. I would value discussing how EIS measures "fit for purpose" across proposed agency solutions and how this role interfaces with **Data Governance and Transparency** initiatives.

Thank you for considering my application.

Best regards, *[Your name]*
