To: Go To Foods - Digital Technology / Talent (Principal Software Engineer, ADP req 5001173496406)

Subject: Application - Principal Software Engineer (#2313)

Dear Hiring Manager,

I am applying for the **Principal Software Engineer** role supporting Go To Foods' **multi-brand digital platform**. The posting matches how I have operated at scale: **owning API and integration boundaries**, partnering with **product and architecture**, and shipping work that has to stay correct in production-not just in demos.

At **Bath & Body Works** I helped lead a **headless** transition (**PWA Kit**) with explicit **service contracts** for **authentication**, **loyalty**, and **orders**, alongside **SAP**, **Salesforce Marketing Cloud**, and analytics paths. Earlier I delivered **Node.js** services with **Express** (**MyUSP 800**), and across my career I have treated **REST**, **retries**, **operational monitoring**, and **CI/CD** as part of the feature. I am strong on **AWS** and **Azure**, comfortable mentoring engineers, and accustomed to **Agile** delivery with **Jira** and **Confluence**. I will be direct: my recent production emphasis includes **Python** and **Golang** as well as **JavaScript/TypeScript**, and I would welcome aligning on **Nest.js**, **Kubernetes**, and **Terraform** depth to match your team's standard-I ramp quickly when the roadmap and codebases are clear.

QSR and **high-promo, high-traffic** retail share the same reality: many brands, tight windows, and **integrations** that cannot fail quietly. That is the environment I know from **omnichannel** programs-including directing **BOPIS** across **114** stores-and I would bring the same **stakeholder clarity** and **technical judgment** to your **pods**.

I am interested in **fixed hybrid Atlanta** and can discuss **relocation** or cadence transparently if we move forward. I use **GitHub Copilot** and similar tools where they improve quality and speed without skipping review.

Thank you for considering my application. A tailored CV for this role accompanies my materials.

Sincerely,

Terry J. Mork
