HVAC Ministries SEO Audit

HVAC Ministries — SEO Audit & Improvement Plan

Site: https://www.hvacministries.org/
Audit date: June 27, 2026
Platform: Wix
Business: HVAC Ministries LLC — heating & cooling services in Oregon

---

Executive Summary

The site has a strong human story (faith-driven values, honest pricing, family-owned) but is currently optimized like a generic Wix template, not a local HVAC business. The biggest issues are a generic page title, weak keyword-focused headings, thin service content, no city-level targeting, and missing technical SEO basics (sitemap, schema).

Current SEO estimate: 4/10
Achievable with fixes below: 7/10+ (no full redesign required)

Critical Fixes (Do These First)

1. Fix the Page Title

Current: `HOME | My Site 1`

Problem: Google and searchers see a placeholder title. This hurts rankings and click-through rate.

Recommended titles (pick one based on actual service area):

- `HVAC Ministries | Heating & Cooling Services in Oregon`
- `HVAC Ministries | HVAC Repair & Installation in Salem, OR` *(if Salem is primary market)*

Where to fix: Wix → Pages → Home → SEO / Page Settings → Title tag

---

2. Add a Meta Description

Current: Likely missing or auto-generated.

Recommended copy:

> HVAC Ministries provides honest heating, cooling, ductwork, installation, repair, and maintenance services for Oregon families. Call 503-385-1432 for service or a free estimate.

Where to fix: Wix → Pages → Home → SEO → Meta description (keep under ~155 characters)

---

3. Fix the Main Headline (H1)

Current: Fragmented headings — "COMFORT / YOU CAN TRUST / SERVICE / WITH A PURPOSE"

Problem: Emotionally strong but weak for search. Google looks for a clear H1 with service + location keywords.

Recommended structure:

- **H1:** `Reliable HVAC Repair and Installation in Oregon`
- Keep tagline below as supporting copy: *"Comfort you can trust. Service with a purpose."*

---

4. Fix Typo in CTA

Current: `GET A FREE ESTMATE`
Fix to: `GET A FREE ESTIMATE`

---

5. Create Separate Service Pages

Current: All services listed on homepage only.

Problem: One page cannot rank well for multiple service keywords (AC repair, heating installation, ductwork, etc.).

Create these pages:

URL slug (suggested)	Page title
`/hvac-installation`	New HVAC System Installation in Oregon
`/ac-repair`	Air Conditioning Repair in Oregon
`/heating-repair`	Heating System Repair in Oregon
`/ductwork`	Whole-House Ductwork Services
`/hvac-maintenance`	HVAC Maintenance & Tune-Ups

URL slug (suggested)	Page title
`/retrofit-hvac-systems`	HVAC System Retrofitting

Each page should include:

- 500–900 words of unique content
- Local keywords (Oregon + cities served)
- 2–4 FAQs
- Photos with alt text
- Clear CTA (Book Service / Free Estimate)
- Phone number: 503-385-1432

Local SEO

6. Add Specific Service Area Keywords

Current: "Local Oregon HVAC Operator" — too vague.

Add to homepage and contact/footer:

> Serving Salem, Keizer, Albany, Woodburn, Silverton, Stayton, and surrounding Oregon communities.

Important: Only list cities/counties you actually serve.

7. Consistent NAP (Name, Address, Phone)

Display clearly in footer and contact section on every page:

```
HVAC Ministries LLC
Phone: 503-385-1432
Email: divineairandhome@gmail.com
CCB: 236663
Service Area: [list cities/counties]
```

Use the **exact same** business name, phone, and email everywhere (website, Google Business Profile, directories).

8. Google Business Profile

For a local HVAC company, Google Business Profile often matters **more than the website** for "near me" searches.

Action items:

- Claim or verify listing for HVAC Ministries LLC
- Add all services (installation, repair, maintenance, ductwork, etc.)
- Upload before/after photos, team photos, truck/logo
- Add business hours

- Set service area
- Ask satisfied customers for Google reviews
- Post updates periodically (seasonal tips, promotions)

Structured Data (Schema)

Add **LocalBusiness** or **HVACBusiness** JSON-LD so Google understands the business type.

Example schema:

```
{
  "@context": "https://schema.org",
  "@type": "HVACBusiness",
  "name": "HVAC Ministries LLC",
  "telephone": "503-385-1432",
  "email": "divineairandhome@gmail.com",
  "url": "https://www.hvacministries.org/",
  "areaServed": "Oregon",
  "description": "Faith-driven HVAC repair, installation, and maintenance for
        Oregon families."
}
```

Where to add in Wix: Settings → SEO → Structured data, or custom code/embed if available on your plan.

Content Improvements

9. Expand Homepage & Service Copy

Strengths to leverage (already on site):

- Faith-driven values
- Eliseo Cortes — dad of 8, local operator
- Honest pricing, quality workmanship
- 1 year free maintenance + labor warranty
- Up to 10-year manufacturer warranties for loyal customers
- Licensed (CCB: 236663)

Add SEO-friendly sections:

- HVAC Repair in Oregon
- Air Conditioning Installation and Repair
- Heating System Maintenance
- Why Homeowners Choose HVAC Ministries
- Licensed Oregon HVAC Contractor
- Frequently Asked Questions

10. FAQ Ideas (good for SEO + schema)

- How often should I service my HVAC system?
- Do you offer free estimates?
- Do you install new heating and cooling systems?
- What areas in Oregon do you serve?
- Are you licensed and insured?
- What warranties do you offer?

Consider FAQ schema markup if Wix supports it.

Technical SEO

11. Sitemap

Finding: `https://www.hvacministries.org/sitemap.xml` returned **404 Not Found**.

Fix: Wix → Marketing & SEO → SEO Tools → enable sitemap / connect Search Console. Wix usually provides a sitemap at a Wix-specific URL — submit that URL in Google Search Console.

12. Wix SEO Checklist

Item	Action
Custom title tag	Every page — not “My Site 1”
Meta description	Every page — unique, under 155 chars
Image alt text	All images — descriptive, include HVAC + Oregon where natural
Mobile layout	Verify buttons and text readable on phone
Google Search Console	Connect site, submit sitemap
Indexing	Ensure site is not set to “hidden from search engines”
Favicon	Add branded icon
Social share image	Set OG image for homepage

13. robots.txt

Verify in Wix that the site allows crawling (`Allow: /` for public pages). Check after publishing any SEO changes.

Image SEO

Current issues: Generic filenames visible in content (e.g. `Image-1 (1).jpg`, `sdfghjkl.png`).

Before upload (when possible), rename files:

- Bad: `Image-1 (1).jpg`
- Better: `hvac-ministries-ac-installation-oregon.jpg`

Alt text examples:

- `HVAC Ministries technician installing residential air conditioning system in Oregon`
- `Before and after HVAC system installation by HVAC Ministries`
- `Eliseo Cortes, owner of HVAC Ministries LLC`

Priority Action List

Priority	Task	Effort
P0	Change homepage title from “My Site 1”	5 min
P0	Add meta description	5 min
P0	Fix “ESTMATE” → “ESTIMATE”	2 min
P1	Add clear H1 with HVAC + Oregon	15 min
P1	Add service area cities to footer/home	15 min
P1	Connect Google Search Console + submit sitemap	30 min
P1	Claim/optimize Google Business Profile	1–2 hrs
P2	Create 6 service pages	2–4 hrs
P2	Add LocalBusiness/HVACBusiness schema	30 min
P2	Alt text on all images	30 min
P3	FAQ section + review request campaign	Ongoing

What This Audit Could Not Verify

Use these tools for the rest:

Need	Tool
Page speed / Core Web Vitals	PageSpeed Insights
Indexation, queries, errors	Google Search Console
Full site crawl	Screaming Frog (free up to 500 URLs)
Rankings & competitors	Manual Google searches: “HVAC repair Salem OR”, etc.

Quick Reference — Business Info

Field	Value
Business name	HVAC Ministries LLC
Website	https://www.hvacministries.org/
Phone	503-385-1432
Email	divineairandhome@gmail.com
CCB	236663
Tagline	Comfort you can trust. Service with a purpose.
